ICE BREAKERTM

with CMA

Over 110 Years of Ice Melting Experience

Schoenberg Salt, established in 1898 has put their generations of expertise into crafting the premium ice-melting product, **Ice Breaker**. **Ice Breaker** contains crystals that are screened for a consistent size and dyed with a green tracer to allow accurate spread and dispersion, while minimizing over use. **Ice Breaker** contains **Calcium Chloride** in its formula for immediate melting power allowing **Ice Breaker** to melt to -25 Degrees Fahrenheit. Not simply relying on ordinary methods, **Ice Breaker** incorporates CMA, the de-icer of the 21st Century into its formula.

Anti-Corrosive Formula

CMA's environmentally friendly aspects are recognized by the U.S. Federal Highway Administration as safe for sensitive areas such as bridges and dams. About as corrosive as tap water, adding CMA to the **Ice Breaker** Formula actually reduces chloride corrosion making **Ice Breaker** safer than Rock Salt when used as directed.

Directions

For best results, **Ice Breaker** should be applied in a consistent layer to a surface which has already had its loose snow and ice removed. Once slush has formed, shovel and repeat with an application of **Ice Breaker**. **Ice Breaker** can be applied at a rate of ¼ to 1 ½ cup per square yard. Actual application and melting rates will depend on temperature and thickness of ice or snow packs.

Applications

Ice Breaker should not be applied to concrete, which has cured less than 18 months or which was not properly mixed, finished, or cured. Any de-icer may cause spalling or flaking on concrete, especially those surfaces that were improperly constructed, are extremely porous, or have mortar joints.

Non Warranty

No warranty expressed or implied concerning the use of this product is made by the seller or manufacturer of **Ice Breaker**. Specifically there is no warranty of merchantability or fitness for a particular purpose made with the sale of this product and buyer waives any rights to make a claim to either to the full extent allowed by law. The seller or manufacturer is not liable for any consequential damages caused by use of **Ice Breaker** or as a result of its misuse, mishandling or any application not specifically described and recommended on this label. Purchaser agrees by opening this product, in the event of damage, no recourse shall be taken against the seller or manufacturer of **Ice Breaker**.
