

Technical Information  
*Premier Extra Coarse Flake Salt*

**DESCRIPTION:**

Premier Extra Coarse Flake Salt is a precisely screened, coarse compacted vacuum evaporated salt. Its crystalline form is similar to that of Alberger salt, but it is of heavier bulk density owing to the smooth flat character of the individual crystals which permits packing.

**ORGANOLEPTIC PROPERTIES:**

Premier Extra Coarse Flake Salt has a characteristic saline taste, and may exhibit a slight halogen odor upon warming.

**COMPLIANCE:**

Premier Extra Coarse Flake Salt is of food grade quality, complying fully with the standards for Sodium Chloride as set forth in the Food Chemicals Codex. It is approved for direct use in meat and poultry products by the U.S. Department of Agriculture Food Safety and Inspection Service.

**ADDITIVES:**

Premier Extra Coarse Flake Salt contains water-soluble Yellow Prussiate of Soda, which is added to improve caking resistance in accord with 21CFR 172.490. When this salt is incorporated into a food product, the additive is considered incidental, non-functional and exempt from label declaration in accord with 21CFR 101.100(a)(3).

**APPLICATIONS:**

Premier Extra Coarse Flake Salt is intended for a variety end-uses. Food uses include topping baked goods, crackers and snack foods, flavoring and preserving cheese, meat and poultry products, and blending with spices, seasonings, soup bases and gravy mixes.

**PACKAGING AND STORAGE:**

Premier Extra Coarse Flake Salt is available in 80lb. multiwall kraft containers, which incorporate polyethylene film liners for added moisture protection. This product is not available in bulk. To improve caking resistance, the product should be stored in a dry, covered area at humidity below 75%.

**METHODS OF ANALYSIS:**

Methods of analysis are taken from ASTM E 534-98, Cargill and the Food Chemicals Codex 5<sup>th</sup> Edition.
