

Superior General Purpose Salt
Watkins Glen, NY production

Description

Superior General Purpose Salt is a food grade, cubic crystalline Sodium Chloride of variable particle size distribution. This salt is obtained from underground salt deposits by deep well solution mining. Subsequent evaporation of this brine by the vacuum pan system, under stringent process control, provides the highest purity and minimal insoluble extraneous matter for salt which contains no additives. Superior General Purpose Salt is recommended for use in a variety of food processing applications, including baking, canning, pickling, seasonings and prepared mixes. Superior General Purpose Salt can also be used in non-food applications such as a carrier or as chemical and bulking agents in many household and personal care products.

Approved Use

Superior General Purpose Salt is generally recognized as safe (GRAS) for use in foods and meets Food Chemicals Codex standards for Sodium Chloride. It is acceptable for direct use in meat products under USDA/ MIS standards and is annually kosher certified as OUP for Passover and the year round.

Availability

Superior General Purpose Salt is available in 50 lb. and 80 lb. net weight, multiwall, polylined, kraft paper bags and bulk.

Storage

To retard caking, Superior General Purpose Salt should be stored in a dry, covered area at relative humidities below 75%. Cycling salt through the 75% relative humidity zone will rapidly increase the onset of caking.

Technical Information

For further product information, contact Technical Manager, U S Salt LLC, PO Box 110, Salt Point Road, Watkins Glen, NY 14891, by phone 607-535-2721 or FAX 607-535-2911.
